Contents

This module offers an introduction to the theory and policy of international trade with special reference to trade policy in developing countries. The contents that will be covered are:

- International trade models (the Ricardian model, the specific-factors model, the Heckscher-Ohlin model, the standard trade model) and impacts on growth and income distribution;
- Movement of labour and capital between countries;
- Increasing returns to scale and monopolistic competition;
- Offshoring of goods and services;
- Import tariffs and quotas under perfect and imperfect competition;
- Export policies in resource-based and high-technology industries;
- The instruments of trade policy;
- The political economy of trade policy;
- Trade policy in developing countries;
- Controversies in trade policy.

Learning objectives and skills

This module aims for students to acquire appropriate skills to critically reflect on and analyse issues of international trade in developing countries. The focus is both on theoretical and policy-oriented knowledge.
